

CONCRETE
JUNCTION
WATERPROOFING (PTY) LTD

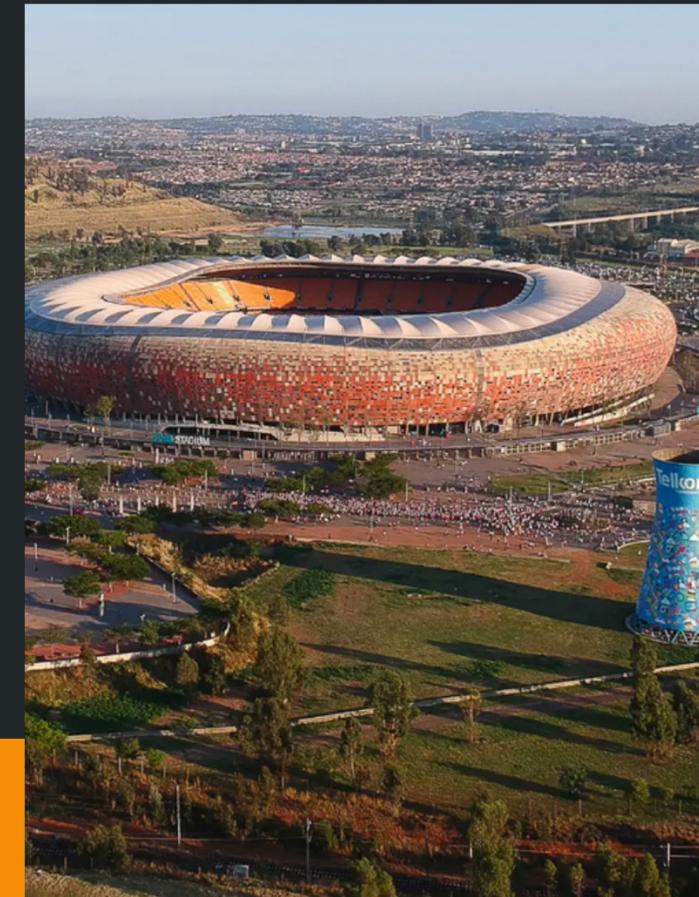

Concrete Junction is a premier consulting and contracting company, dedicated to the installation and assurance of top-tier professional waterproofing applications

WELCOME

Welcome to Concrete Junction, where excellence meets innovation in specialized waterproofing consulting and contracting services.

ABOUT US

For three decades, Concrete Junction has been a leading name in specialized consulting and contracting services, catering to Construction, Civil Engineering, Corporate, and the Mining Industry. With 30 years of experience, we excel in designing, installing, and insuring high-quality applications, emphasizing environmental sustainability and adherence to building regulations.

Our commitment extends to community upliftment through ongoing training initiatives that have successfully elevated individuals to Senior Site Management positions. At Concrete Junction, we forge partnerships based on three decades of expertise, reliability, and an unwavering pursuit of excellence in delivering holistic solutions against water damage and exceeding industry standards.

COMPANY HISTORY

Established in January 1994 by Leonard Scott-Turner who has over 30 years experience in the industry; the company has rapidly become a leader in its specific fields, utilising the strengths of a highly performance based management team and well trained staff. Contracts are carried out across the whole of Southern Africa.

01

BEE - Concrete Junction has 10% black ownership and complies with the Construction Sector Codes.

OUR SERVICE

Specialized consulting and contracting services, serving Construction, Civil Engineering, Corporate, Domestic and the Mining Industry. We excel in designing, installing, and insuring high-quality waterproofing applications while prioritizing environmental sustainability and compliance with building regulations.

WATERPROOFING DESIGN

The waterproof design process involves a comprehensive approach to safeguard structures against water infiltration. It begins with a thorough site assessment and understanding of local building codes, followed by a risk analysis to identify vulnerable areas. Material selection, integration with construction elements, and the implementation of drainage systems are crucial steps. Quality assurance, testing, and regular maintenance considerations contribute to the effectiveness and longevity of the waterproofing system. Throughout the process, documentation is maintained to provide valuable reference for future maintenance and renovations.

OUR SERVICE

WATERPROOFING

- Torch-on Membranes
- Self Adhesives
- Cementitious Systems & more

JOINT SEALING

Concrete, brickwork, granite, aluminum, and glass.

POLYUREA SPRAY-ON WATERPROOFING

High traffic areas that demand robust mechanical and chemical resistance, rapid project completion, and immediate return-to-service.

OUR SERVICE

INDUSTRIAL FLOORING

These systems deliver highly resilient and durable workhorse surfaces.

EPOXY CRETE

An adhesive used for bonding concrete. Epoxy resins are used with concrete

GROUTING

Pressure Grouting of Voids and Gravity Grouting

OUR SERVICE

STRUCTURAL PAINTING

Factories - Stadiums - Facades

VERTICLE WATERPROOFING

Basement Walls Both Internally and Externally
- Negative Pressure (Vandex) Protection and
Drainage - Lift Pits - Escalator Shafts

INSULATION

designed to reduce the transfer of heat,
sound between surfaces, providing a barrier
that helps maintain a desired temperature,
enhance energy efficiency, or minimize noise.
